- Commercial customers (Spar / Rewe / shops/ hospitals / canteens and other similar businesses
- With the brand Resch & Frisch frozen bakery products has 1200 catering franchisees as clients and more than 35000 end-consumers

### With these branches we have the following distribution companies:

- LWB "Linauer und Wagner Meisterbackwarenproduktions-gesmbH"
- Linauer GesmbH for the branch offices Linauer
- Wagner GesmbH for the branch offices Wagner
- Linauer und Wagner BackwarenvertriebsgesmbH for gastro-customer
- Backprofi GesmbH for the end-consumer

LWS is the head office and offers the following internal services:

- Accounting

- Payroll
- Controlling
- Organizational development
- Marketing

and provides management to all linked companies.

### How many people are employed, the lumbar spine and your daughter companies?

Within all linked companies and branch offices there are about 380 people working with us.

### What critical business processes were found within your organization, to help you decide to choose TaskTimer?

- Time- and Resource planning within management
- Project Controlling and management
- Overview of recurring tasks
- Central Address and People-register

### Why did you choose TaskTimer?

Mr. Wagner - one of our General Managers - had been using TaskTimer already and after an in-depth market-analysis we were not able to find a comparable competitive product providing same functionality and ease of use...

**Specifically how using TaskTimer X solution help you and your team on your day-to-day business?**

- With easy access to TaskTimer from outside the premises, using mobile devices allow the collaboration across multiple business locations
- Over all, linked employees to activities

**What are the advantages of using TTX to your company & employees?**

- The use of a single data storage
- Absolute timeliness of data

**On what platforms you use TTX? (Eg, iPad, Desktops, Laptops, etc. ... and Operating Systems) Desktops, Laptops, Netbooks?**

At the time we are mostly connecting using devices with Windows Operating Systems.

Our next step – (already tested and approved) - is to provide applications such as mobile devices (e.g. iPads or Android-Tablets) to users in the market.

**How many TTX users do you have in the organization?**

Currently, about 20 users

**Can you explain how using TTX change productivity within your company?**

We had strong growth in the past years and a massive restructuring in the company. Since then, TaskTimer has really helped us to streamline the operations, kept the plans at a glance and move things to defined goals.

**What solutions TTX users report within your company?**

Mobile people are happy with the improved performance.

People who are used to work with LAN do not feel any difference since we added TaskTimer X - into our environment.

**For more information or to assess your business needs on the correct services to the transition to TTX – contact**
